PROFESSIONAL SUMMARY

Full-Stack Developer experienced in React, Python, Node.js, Express, MySQL, and MongoDB. Focused on building functional web products that solve real business problems, from interface design to the integration of cloud services and artificial intelligence. Has led the development of systems that reduced operating costs and improved the efficiency of internal processes at the companies where he has worked.

PROFESSIONAL EXPERIENCE

Frontend Developer (Freelance) | OrangeLogistic

June – July 2026

Ica, Peru

- Designed and developed a modern corporate website that strengthened the company's digital presence and improved its brand perception.
- Translated Figma designs into an interactive web experience using Astro, Tailwind CSS, GSAP, and Three.js.
- Integrated a custom 3D model of the company's shipping container as a distinctive element of the site's visual identity.
- Implemented advanced animations inspired by Awwwards-level sites, delivering a differentiated experience without compromising performance.
- *Stack:* Astro, Tailwind CSS, GSAP, Three.js, Figma.

Full-Stack Developer | Collie Valley

July 2025 – February 2026

Ica, Peru

- Participated in the full-stack development of ***Collie App***, a 7-module agricultural ERP (Products, Sales, Production, Logistics, Finance, HR, and Quality) that centralized the company's entire operation into a single platform.
- Implemented automatic PDF generation from stored database records, eliminating manual document assembly and freeing the team from a repetitive task.
- Owned platform maintenance and production bug fixes, keeping the system stable and operational for daily use across the company's teams.
- Designed the UI for all 7 modules with a focus on usability, which made adoption easier for non-technical teams (sales, logistics, HR).
- *Stack:* ReactJS, Python, FastAPI, Google Cloud Platform.

Full-Stack Developer | Global Certification Perú

October – December 2024

Ica, Peru

- Developed new features for the certifications platform, streamlining the scheduling and document-issuance workflow for the administrative team.
- Automated certificate generation in Excel format through dynamic database queries, eliminating document-by-document manual work.
- Identified and fixed critical bugs in the exam-grading process, eliminating errors that affected results shown to end users.
- Built a system that lets tutors create custom exams with any number of questions, increasing platform flexibility for new clients.
- *Stack:* PHP, React.js

PROJECTS

Khipu - Queue Management System | [View project](#) | [Code](#)

2026

- Collaborated on the frontend of a platform for queue and appointment management, built with React and Vite, prioritizing an intuitive and responsive interface.
- Integrated the REST API built by the backend team in Java, consuming services for appointment scheduling, users, and system modules.
- Worked closely with the backend team to ensure efficient communication between the interface and the services, contributing to a smooth user experience.
